Sequence 5. Application US/10121925

PHUBLICATION NO. US20030104505A1

GENERAL INFORMATION:
APPLICANT: ROBISON, KEITH E.

ITILE OF INVENTION: NUCLEIC ACID MOLECULES ENCODING HUMAN KINASE AND TITLE OF INVENTION: PHOSPHATASE HOMOLOGUES AND USES THEREFOR FILE REFERENCE: MNI-090

CURRENT FILING DATE: 2002-04-12

PRIOR APPLICATION NUMBER: US/99/948,802

PRIOR APPLICATION NUMBER: US/99/948,802

PRIOR APPLICATION NUMBER: 09/87,212

PRIOR APPLICATION NUMBER: 09/87,212

PRIOR FILING DATE: 1999-08-31

NUMBER OF SEQ ID NOS: 18

SOFTWARE: Patentin Ver. 2.0

SEQ ID NO 5

SEQ ID NO 5

LENGTH: 361

TYPE: DNA

ORGANISM: Homo sapiens

PEATURE:

OTHER INFORMATION: All occurences of n indicate any nucleotide

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               OM nucleic - nucleic search, using sw
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Database
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Total number of hits satisfying chosen parameters:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Scoring table:
          Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 5, Application US/09387212A

Patent No. 6309849

GENERAL INFORMATION:
APPLICANT: ROBISON, KEITH E.
APPLICANT: ROBISON, WICLEIC ACID MOLECULES ENC.
TITLE OF INVENTION: NUCLEIC ACID MOLECULES ENC.
FILE REFERENCE: MNI-0900

CUURRENT APPLICATION NUMBER: US/09/387,212A

CURRENT FILING DATE: 1999-08-31

NUMBER OF SEQ ID NOS: 18

SOPTWARE: Patentin Ver. 2.0

SEQ ID NO 5

LENGTH: 361
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                RESULT 5

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime
end enriched, double-strand cDNA was digested with Not I and cloned
into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library
was normalized. Library was constructed by Life Technologies, a
division of Invitrogen. This sequence belongs to sequence cluster
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Li,W.B., Gruber,C., Jessee,J. and Polayes,D. 1st strand.cdnA was primed with a NotI-oligo(dT) primer. Five prime
end enriched, double-strand cDNA was digested with Not I and cloned
into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library
was normalized. Library was constructed by Life Technologies, a
division of Invitrogen. This sequence belongs to sequence cluster
                                                                                                                                                                                                                                                                                                         Homo sapiens

                                                                                                                                                                                                                                                                                                                                                                                                       Submitted (20-JUL-2004) Genoscope - Centre National de Sequencage : BP 191 91006 EVRY cedex - FRANCE (B-mail : seqref@genoscope.cns.fr - Web : www.genoscope.cns.fr)

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen.
